

NOVEXSYS

The *New Standard* in Property Management Systems

SOFTWARE as a SERVICE

SaaS has been a dream in the Hospitality industry for many years. NOVEXSYS has made it a reality today. The NOVEXSYS SaaS platform provides our clients with a PMS that is maintenance free...A system where you pay only for what you use...A system that requires no expensive software licenses. It is the ideal solution for today's lean hospitality budgets!

HARDWARE REQUIREMENTS

NOVEXSYS will run on any PC with a current version of Microsoft® Windows™. There is no need for hotels to replace any of their existing hardware!

SYSTEM MAINTENANCE

System Maintenance is a thing of the past with NOVEXSYS. All maintenance, backups, and upgrades are handled by NOVEXSYS and are included in the low monthly service fee!

- Easy to buy
- Easy to install
- Easy to train
- Easy to maintain
- Easy to use
- Easy to afford

To the hospitality industry, NOVEXSYS is the 'New Standard' in hotel systems. Derived from Latin terms 'Novus' (New) and 'Vexum' (Standard), NOVEXSYS has been designed to take advantage of the Microsoft® .NET framework to provide hotels with a Web-based solution that is stable, scalable, and easy to use.

NOVEXSYS allows hotel owners and operators to benefit today from state-of-the-art technologies. We do that by removing the most expensive components of the Property Management System from the property. The NOVEXSYS servers are installed centrally in a fully redundant datacenter which is maintained by qualified technicians 24x7x365. The system requires no upfront capital expenditures for the replacement of current hardware in order to install. All it takes is a computer running a current version of Microsoft® Windows™, a few clicks of a mouse, and you can be up and running in just a few minutes.

While the cost to operate the system may be lean, the functionality of the application is just the opposite! NOVEXSYS is a robust Property Management System that was designed with ease of use in mind. It is multi-property capable and has full reservations, front desk, accounts receivable, group block, and rate restriction functions. NOVEXSYS is a web based application optimized for speed and security over the internet.

Your managers will also find it easy to learn and to train others on the NOVEXYS functionality. Average users can be trained and operating the system in less than two hours. With an additional two hours, super-users can be knowledgeable of the entire system.

Easy to buy, easy to install, easy to train, easy to maintain, easy to use, and easy to afford. NOVEXSYS is the New Standard!

NOVEXSYS

The World of NOVEXSYS

NO SOFTWARE MAINTENANCE

Installations of the NOVEXSYS PMS are always on the current version. Gone are concerns about dropping so far behind in version that your PMS will become obsolete and no longer be supported. When the NOVEXSYS PMS is upgraded, ALL properties receive the upgrade the next time they log in. For the first time in history, software upgrades are truly FREE.

SIMPLE USER INTERFACES

From both a usability and training standpoint, this back to basics philosophy is making PMS software as easy to use as internet applications. This is a must to keep the attention of today's users.

NO TRAVEL INSTALL™

With easier to understand user interfaces, minimal training, and no new hardware, travel to the hotel to install NOVEXSYS is no longer necessary. The flexibility of our installation process has been a major selling point of the application with our existing clients.

Ease-of-use

Anytime, anywhere access
Easy to learn
Quick user adoption

Low Cost

No investments in software & hardware
No additional IT Support Staff required
All services managed by NOVEXSYS

Security & Reliability

Multiple security levels
Individual databases for each customer

SYSTEM REQUIREMENTS

PC with Windows 2000 or newer and access to the internet.

The following components are installed automatically if they are not already present on your PC during the installation process:

- Microsoft .NET Framework 2.0
- Microsoft Visual Studio 2005 Report Viewer
- Microsoft WSE 3.0 Runtime
- NOVEXSYS—small client executable that is automatically updated with each new software release.

INTERNET REQUIREMENTS

The minimum recommended speeds for a high speed internet connection are 756k down and 512k up. Per user bandwidth is generally less than 56K. Most of the internet traffic is download traffic. Upstream traffic is minimal for transactional inserts and updates.
